Professional Summary

SAP Commerce Technical Lead & Solution Architect with **8+ years of experience** across B2B, B2C and B2B2C enterprise commerce, combining hands-on **Java/Spring engineering** with solution architecture, enterprise integration, performance engineering and technical leadership. Experienced in **SAP Commerce/CX, S/4HANA, C4C/Service Cloud, CPI and BTP**, with applied **GenAI** across RAG, enterprise chatbots, multi-agent systems and AI-enabled commerce. Proven in leading **15+ engineers**, designing scalable integrations and translating complex business requirements into maintainable, high-performing enterprise solutions.

Core Expertise

Commerce	SAP Commerce Cloud, SAP CX, SAP Hybris, B2B/B2C/B2B2C Commerce, OCC/OCC APIs, Spartacus, Headless Commerce, Backoffice, Solr, FlexibleSearch, ImpEx, Groovy, Hotfolder, Data Migration.
Architecture & Integration	Solution/Technical Architecture, API Architecture, Enterprise Integration, SAP S/4HANA, SAP C4C/Service Cloud, SAP CPI, SAP BTP, REST/SOAP, third-party, POS and logistics integrations.
Engineering & Performance	Java, Spring, Spring Boot, Spring Security, SQL, MySQL, Data Modelling, Database/Query Optimization, Indexing, Performance Engineering, Scalability, JVM concepts.
AI & Leadership	GenAI, LLMs, RAG, Multi-Agent Systems, AI Agents, OpenAI APIs, Enterprise AI, Conversational AI, Prompt Engineering, AI Guardrails, Human-in-the-Loop, Human Override, Responsible AI, Data Privacy & Protection, Sensitive Data Masking/Hashing, Technical Leadership, Solutioning, Estimation, Mentoring, Code Review, Release Management.

Professional Experience

Senior Associate — PricewaterhouseCoopers (PwC) India

Apr 2024 – Present | Kolkata, India

- Lead Commerce solution design, technical estimation, development, code review, releases, incident resolution, and client-facing technical discussions for a large B2B SAP Commerce platform.
- Design and deliver integrations with SAP S/4HANA, SAP C4C/Service Cloud, SAP CPI, logistics providers, and SMS/WhatsApp services through implementable APIs and data flows.
- Independently lead the **JDK 17 to 21 migration** within a SAP Commerce upgrade, resolving Java API/security compatibility, deprecated APIs and dependency changes; established an upgrade approach subsequently adopted by other projects.
- Improved platform maintainability and scalability through data-model optimization, database/performance improvements, reduced unnecessary customization, greater use of SAP Commerce OOTB capabilities and reusable business-process patterns.
- Lead technical/project delivery for a new B2B2C Retail transformation, translating requirements into architecture, data models, integrations and implementation plans for a **15+ member team**; Phase 1 targets **6–7 stores in 3 months**, with a long-term target of 1,000 stores.
- Established reusable notification architecture using business events, business processes and notification actions for WhatsApp/SMS/email, reducing duplicated implementation and improving extensibility.

Senior Consultant — Birlasoft

May 2022 – Mar 2024 | Pune, India

- Engineered SAP Commerce capabilities for a large US B2C footwear platform across Java/Spring controllers, services and DAOs, REST APIs, data modelling, Solr search and storefront integrations.
- Addressed performance and scalability constraints in a heavily customized Commerce implementation through data restructuring, indexing, query optimization and large-scale migration work.
- Modernized storefront architecture by supporting migration from legacy JSP storefront technology toward SAP Spartacus/headless Commerce, adapting backend and OCC API interactions.
- Implemented a Commerce-based cashier/POS capability connecting store transactions with customer Commerce accounts, order information and loyalty/omnichannel experiences; mentored junior developers and supported estimation, testing and controlled releases.
- Mentored junior developers on design and coding challenges, and supported technical analysis, estimation, testing, and controlled releases.

Consultant — Birlasoft

Oct 2020 – May 2022 | Pune, India

- Developed and maintained SAP Commerce solutions using Java, Spring, MySQL, XML/JSON web services and Solr across analysis, design, implementation, unit testing and releases.

- Supported data migration and storefront modernization using Hotfolder and Groovy, including Commerce backend changes required for Spartacus adoption.
- Applied requirements analysis to translate business needs into SAP Commerce enhancements and environment releases

Business Technology Analyst — Deloitte US-India

Aug 2018 – Oct 2020 | India

- Delivered SAP Commerce/Hybris solutions across B2B, B2C and MLM e-commerce engagements, contributing to modules, integrations and technical problem solving within approximately 10–20 member teams.
- Built Commerce components and integrations using Java, Spring, JavaScript, MySQL, XML, JSON and Solr while supporting business communication and end-to-end delivery.

AI & GenAI Innovation

- **Enterprise AI Commerce Assistant - Client Deployed:** Built an end-to-end enterprise AI chatbot spanning Angular frontend, Java backend, AI/API integration, multi-agent orchestration, RAG/knowledge grounding and SAP Commerce/Service Cloud APIs; deployed for a client and being adapted for another.
- **Multi-Agent Executive Business Copilot - Innovation Concept:** Designed an executive decision-support concept combining enterprise retrieval, reasoning, forecasting and root-cause analysis with drill-down exploration.
- **SAP Commerce + Service Cloud Live-Agent Chat:** Built a SAP BTP middle layer connecting Commerce and Service Cloud UIs, exploring agent availability, assignment, conversation history and Commerce-to-Service Cloud routing.
- **AI B2B Replenishment Engine:** Built an AI-driven replenishment engine that analyzes historical purchase patterns to identify delayed purchases, predict potential revenue/churn impact and recommend no-action, nudge or incentive strategies. Supports configurable rules for customer-health-based automated offers and business reporting.
- **AI Integration Healer:** Built an AI-driven integration troubleshooting engine that analyzes production logs, matches known issues against a structured knowledge base and recommends or triggers predefined remediation actions. For new issues, it researches SAP documentation and provides solution recommendations with confidence scores.
- **AI Product Companion / PDP Helper:** Built an AI product assistant that analyzes user intent, product documents and media to answer product questions, recommend alternatives/bundles and enable cross-sell/upsell. Tracks **product purchase-confidence** and budget signals to support targeted business interventions.
- **Business-Aware Enterprise Chatbot:** Built a domain-specific AI chatbot for business-focused Q&A with controlled, context-aware responses and business-positive recommendations.

Education & Certifications

Bachelor of Technology (B. Tech), Electronics & Electrical Engineering — KIIT University, Bhubaneswar | 2018

Certifications & Professional Learning: SAP Commerce / Hybris; SAP Generative AI; SAP AI Ethics; Generative AI for eCommerce; Prompt Engineering for Web Developers; SAP CX AI Toolkit implementation for SAP Commerce.

AI Innovation Recognition

Winner — PwC India AI Hackathon / AI Innovation Recognition for business and client impact through AI integration.
